GSI HEALTH RECEIVES CERTIFICATION AT 12th ANNUAL IHE NORTH AMERICAN CONNECTATHON

GSI Health completes and passes interoperability tests with more than 25 healthcare IT vendors

PHILADELPHIA, PA — GSI Health successfully verified and certified its HIE platform, GSIHealthExchange, at the Integrating the Healthcare Enterprise (IHE) North American Connectathon, January 17-21, 2011 in Chicago, IL. GSIHealthExchange offers Software-as-a-Service (SaaS) delivery HIE solutions and integration services to enable better health information interoperability. During the five-day event GSIHealthExchange successfully tested interoperability with more than 25 healthcare IT vendors and verified more than 125 test cases. All the testing use cases were designed by IHE to validate the standards conformance, prove system's behavior in real world care coordination and transition scenarios, and verify seamless integration among interoperating systems.

“GSI Health is already considered a key expert in the industry for its architectural and standards development leadership. Now our success at Connectathon 2011 also puts a stamp of approval on our ability to implement IHE standards and confirms our commitment to adopting and implementing standards-based HIE services,” said Lee Jones, CEO of GSI Health. “We are proud of our success at the event, and pleased to collaborate with the health IT community to work towards streamlining interoperability frameworks.”

About GSI Health

GSI Health is a leading health information solutions provider dedicated to improving the quality of healthcare and reducing costs. Our goal is to establish the free flow of information as ubiquitous in the healthcare industry by setting the market standards for health information exchange and management services and a new-generation of cloud-based health applications that are smart, interchangeable yet can work as composite solutions based on the clinical and operational needs of doctors, hospitals and patients. Our customers include provider organizations, including accountable care organizations, health information exchange organizations, and government as well as health IT vendors seeking interoperability solutions and/or a ‘storefront’ in our *GSIHealthConnect* application marketplace.
